

## History of Changes to In-Hospital Questionnaire

- For early questionnaires that contain the grey box, this box is ignored.
- Only those women who had a scheduled-c section are exempted from questions A5a-A8 and from the 24-hour questions.

8 May 2001

- Questions in the Work Activity table are numbered F instead of B.
- For some reason, completed questionnaires from hospital interviews using this version did not include Supplemental Sheets for Other Activities- 7 days and for Other Activities- 24-Hours.

13 June 2001

- Renumbered Work Activity table to B. Variable names all reflect B numbering.
- Added 24-Hour question to Work Activity, Recreational Activity, Outdoor Activity, Indoor Activity, and Child and Adult Care Activity tables. 8 May versions that should have asked 24-Hour questions in these sections were coded as missing.
- Made 24-Hour questions in Transportation Activity, Stairs, Walking, and Eating sections more obvious.

28 June 2001

- Added 2<sup>nd</sup> breakfast and 2<sup>nd</sup> lunch response options to C4 in eating section (Section C). These come after snacks, although snacks should come after these two additions because there is room for five separate snacks. When doing the coding, switch times to correct order for entry (i.e., breakfast time, lunch time, then snacks).

12 July 2001

- Added “How Far?” column to Child and Adult Care Activity table. This question was numbered incorrectly (B25c) and subsequent columns were not renumbered. Variable names reflect what the numbering should be (i.e., B23e, B23f, B23g). This question also does not match wording of prior “How Far?” questions in this section. In all other versions of this table (e.g., Phone Interview I, Phone Interview II), the question was asked “On average, how far did you usually...?”. This question was asked as “On average, how far did you usually walk one-way?”. The solution was to create a variable that would double the amount entered into a dummy variable. This doubling occurs at data entry. Both variables occur in data set.
- Added “Feet” response option to B25c, B25h, B27c, and B27h.
- Fixed ordering of response options in C4 so that 2<sup>nd</sup> breakfast and 2<sup>nd</sup> lunch come before snacks. Variable names reflect this ordering.

19 July 2001

- Added Section D (preliminary information and introduction to study). This section is comprised of questions D1-D4. All prior questionnaires that did not provide this information are coded as missing.
- Dropped grey box from Section A.

24 August 2001

- Added response options 6-9 to B3. Changed other response option numbering from 5 to 95. Changed don't know response option from 8 to 98.
- Added response options 16a (head) and 16b (face) to B4.
- Added B5a (what type of physical activity were you doing when the injury occurred?).
- B5 became B5b. Variable name reflects new number.
- Added B5c (what was the highest level of medical treatment you needed?).

28 November 2001

- Added question A3a to replace question A8. This new question was designed to have woman provide us with information as to what she felt might have caused her to go into labor when she did.

- Dropped question A8 (Anything happen to make you deliver when you did?).
- Dropped question B11 (How many hours/minutes spent standing at work?).
- Dropped question B12 (How many hours/minutes spent sitting at work?).
- Added question B11a to replace B11 (In past week, how often job require you to stand?).
- Dropped question B20 (On typical day, how many hours/minutes spent standing while not at work?).
- Dropped question B21 (On typical day, how many hours/minutes spent sitting while not at work?).
- Dropped earlier variables constructed for “How Far?” section of Child/Adult Care Table. Replaced them with new variables for miles, blocks, and feet, as question no longer reflects one-way trips. It now asks for “on average, how far did you usually (activity).”
- Structure of Section C (Eating Patterns) completely revamped. No longer ask for total number of meals and snacks for both week before and 24-hour before came to hospital. Added leading question to determine whether woman eats particular meal before asking what time that meal is eaten. Dropped 2<sup>nd</sup> lunch and 2<sup>nd</sup> dinner from 24-hour before questions.
- New database (IHv2) created for entry of these questionnaires.

15 February 2002

- Dropped question A6a (What day and time did your water break?).
- Added question A6c (What day and time did your water break?) to replace A6a. A6c does not have response options of before or after hospital admission.
- Dropped question A6b (Do you know about when your water broke?).
- Added question A6d (Do you know about when your water broke?) to replace A6b. Skip patterns based on responses to this question represent difference from A6b.
- Added question A6e (Did your water break before or after you were admitted to the hospital?).
- New database (IHv3) created for entry of these questionnaires.

### Main Data Record

NOTE: SAS label appears in caps, expanded label appears in lowercase where necessary.

Var. name	Len	Label	Comments
PATID	5	PATIENT ID	between 30000 and 40000
LABID	4	LABORATORY ID	
IHVDAY	2	IN HOSPITAL VERSION DAY	SEE PAGE 1 FOR VARIOUS VERSIONS OF THE IN HOSPITAL QUESTIONNAIRE  between 1 and 31
IHVMON	2	IN HOSPITAL VERSION MONTH	between 1 and 12
IHVYR	4	IN HOSPITAL VERSION YEAR	between 2000 and 2005
<b>SECTION D: Preliminary Information and Introduction</b>			
NOTE: This section was added in 19 July 2001 version. All earlier questionnaires had interview date. Some early questionnaires included recruiter id.			
IHD01	2	IN HOSPITAL RECRUITER ID	<i>var added 19 July 2001</i>
IHD02A	2	IN HOSPITAL INTERVIEW MONTH	between 1 and 12
IHD02B	2	IN HOSPITAL INTERVIEW DAY	between 1 and 31
IHD02C	4	IN HOSPITAL INTERVIEW YEAR	between 2000 and 2005
IHD03	4	START TIME OF INTERVIEW	between 0000 and 2359  <i>var added 19 July 2001</i>
IHD04	4	END TIME OF INTERVIEW	between 0000 and 2359  <i>var added 19 July 2001</i>
<b>SECTION A: Timing of Delivery</b>			
NOTE: Versions prior to 19 July 2001 had a grey box that asked the recruiter to review the answers to A2-A4. If the woman answered "yes" to any of the questions, all questions to A7 were supposed to be skipped, as well as all 24-hour questions. Executing this protocol proved extremely difficult and led to many errors, so the protocol was changed such that only those women who had a scheduled c-section were to be excluded from 24-hour questions. The skip pattern for these women also changed, such that they were skipped to section B after answering that they had had a scheduled c-section in A2. Coding and data entry reflect this latter protocol of only excluding scheduled c-sections from 24-hour questions. Data for those who do not fit into this latter protocol, but had the earlier version of the questionnaire, have those questions that should have been answered coded as missing (9s).			
IHA01A	2	MONTH CAME TO HOSPITAL FOR DELIVERY	between 1 and 12

IHBAT	3	IN HOSPITAL BATCH NUMBER	

## SECTION E: CHILD AND ADULT CARE ACTIVITY

NOTE: There will be a separate data record for each row of the Child and Adult Care Activities Table. There are a total of 9 possible records.

NOTE: The section that asks HOW FAR an activity was done was added to 12 July 2001 version. When this question was added, however, it asked how far in terms of one-way trips. All other phrasings of this questions (e.g., Phone Interview I) asked the question in terms of round trips. To deal with this situation, a variable was created that would double the value that appears on the questionnaire. Both the original value and the doubled value appear in the data record.

NOTE: The above mentioned problem with the HOW FAR section was corrected with the 28 November 2001 version. New variables were created to accept values from this correction.

NOTE: 24-Hour questions should not be asked of those women who had scheduled c-section.

NOTE: 24-Hour questions are missing from 8 May 2001 version.
